

NYTORQ®

Nylok's NYTORQ® lubricant provides excellent lubricity.

NYTORQ is an opaque color liquid that can be used in a wide variety of industrial and manufacturing applications. It can be combined successfully with NYLOK® BLUE® PATCH, NYLOK® PELLET or TORQ-STRIP® self-locking applications.

- Useful in a wide range of applications
- Ideal for reducing the installation torque on tri-lobular type and/or self-threading screws
- Non-toxic, assembler friendly
- Reduces operator fatigue
- Cost effective: reduces total installation costs
- Use on any fastener which requires controlled or lower drive torque during installation
- Melting temperature 120°C (248°F)

INNYVATION & Nylok NYTORQ.

Innyvation is Nylok's word for our way of developing new products that solve challenges our customers are facing. It's backed by a host of worldwide patents.

NYTORQ was Nylok's answer to a problem facing virtually every company in the automotive industry. Plants were experiencing inconsistent driving torques during assembly operations. The installation tools were chattering during assembly, and stopping before proper clamp load was achieved.

Nylok introduced **NYTORQ** and once it was tried, process engineers found **NYTORQ** eliminated chattering, and smoothed installation which resulted in proper clamp loading with a much lower installation torque.

If it's new, it's Nylok.

Today at Nylok, we perform thousands of product engineering tests and simulations each year. The result is an ever-growing number of patents for products, processes and equipment which continues to lead the field of fastener technology.

Recommendations from Nylok engineers have saved customers thousands of dollars. Many companies have experienced the value of working with us early in the design stage.

How much time and/or money can our kind of innovation save you? Why not find out for yourself by calling us in on your next project?

The earlier, the better.

NYTORQ meets and exceeds these key industry specifications:

COMPANY NAME	SPECIFICATIONS
DAIMERCHRYSLER	MS-9775
FORD	WSS-M21P27-A4
GM	9986167
